

OUR MISSION

Strickland Consulting, Inc. is dedicated to providing result-oriented, customer-focused solutions. Customer services are offered and engagements carried out based upon a value management framework that assesses successful progress along three dimensions: business value, technology fit, and financial return.

Founded in 1999, Strickland Consulting, Inc. provides server virtualization services for disaster recovery, consolidation and desktop virtualization. We also serve as a reseller of the hardware or software that may be needed for these projects through our partnerships with a wide range of vendors.

Strickland Consulting's second area of expertise is as a NetIQ "go to" Consulting Partner. We provide architecture design, deployment and staff training for a number of NetIQ solutions.

Strickland's principals, Susan Davidson, President, and Jim Stansbury, Vice President and Chief Technology Officer, bring a combined experience set of over 35 years in Information Technology services—the majority of it working in large, complex, enterprise environments. Our customers include small, medium and large businesses as well as Federal, State and local government agencies and military bases nationwide.

We have been certified as a woman-owned, small business by the Small Business Administration.

- ◆ Virtual Infrastructure Management
- ◆ Ongoing Health Checks
- ◆ Staff Training

INTEGRATED SOLUTIONS

Disaster Recovery in a Box

Fully integrated, virtualized and scalable disaster recovery solution ready for deployment. Included is all the necessary hardware, software and guidance necessary to implement and efficiently test your organization's ability to recover in the event of a disaster or a disruption in business operations.

Computer Room in a Box

Stand up a fully configured, virtualized computer room or data center in a fraction of the time it would normally take to design, select servers, determine placement, select software and storage solutions, procure, rack, migrate data and manage the environment.

ALLIANCES

Strickland Consulting partners with a variety of hardware and software vendors so that one stop procurement efficiencies can be realized—from start to finish. We offer servers for example from Dell, Hewlett Packard and IBM, hardware from Cisco, EqualLogic SANS as well as those from other manufacturers and software from CiRBA, DataCore, Dynamic Ops, PlateSpin/Novell, Vizioncore/Quest, and VMware.
